

RidgeRock II

The RidgeRock® Retaining Wall System was developed by soil retention specialists to meet the specific design requirements of engineers, architects, contractors, and homeowners.

The RidgeRock II product line features two facing options in a variety of colors:

- Beveled Face with a split face texture and unique patterns
- Straight Face with crisp, clean edges and lines
- Matching cap unit

Design Applications

Commercial & Retail Centers ▶

RidgeRock II increases usable space, adding valuable parking and building footage to your development.

Apartments, Condominiums, & Multi-Family Housing ▶

Severe space constraints and space consuming grade changes are eliminated by the use of RidgeRock II.

Highway & Transportation Systems ▶

RidgeRock II minimizes transportation right-of-way acquisition and provides economical and aesthetically-pleasing bridge abutments and wing walls.

Homes ▶

Landscaping areas are enhanced and property constraints are minimized by the use of RidgeRock II.

Installers and homeowners love the ease and speed of installation since RidgeRock II weighs approximately 55 pounds per block.

RidgeRock II was developed to have the same ease of installation and overall structural integrity as our famous RidgeRock® product.

Located on the underside of each RidgeRock II block is a specially-engineered Shear Key that engages with the block immediately underneath it for a snug fit during installation.

BEVELED FACE

STRAIGHT FACE

CAP FACE
